

Security in Motion

Mobile Video Security Solutions

Honeywell

Just because you're in motion...
doesn't mean you don't need video.

Reliable Mobile Solutions

Organizations around the world use video security to protect commercial buildings, schools, prisons, retail stores, etc. But are they sure they're protecting everything—like the vehicles that transport people to and from these facilities?

Everyday, millions of travelers take advantage of air, ground and rail transportation with the expectation that they'll arrive at their destinations safely. And with today's heightened security, organizations are searching for reliable video and surveillance solutions from a partner they can trust.

At Honeywell, we offer a broad range of mobile video security products for just about every vehicle around. From subways and light rails, to school buses, transit buses and taxis, to ferries and airplanes, Honeywell's digital recording systems, cameras and receivers, including our state-of-the-art GPS solution, are protecting people with security in motion.

“We believe that installing cameras in each taxi will deter potential assailants.”

– John Paris
Vancouver Taxi Association
and Yellow Cab

Mobile Video Security Solutions

Mobile Recorders

HTRD400 Series Mobile Digital Data Recorder

The HTRD400 Series captures sharp, crisp images and clear audio, including 4 channels of video and audio. This recorder

has storage up to 80GB and wireless access.

Ideal applications include: Transit (including bus, rail, light rail, etc.), School bus, Paratransit and Fleet.

HTRD100 Series Mobile Digital Video Recorder

The HTRD100 Series captures sharp, crisp images and clear audio, including two video inputs and one audio input. This system offers an

easy way to upgrade from analog to digital.

Ideal applications include: Transit (including bus, rail, light rail, etc.), School bus, Paratransit and Fleet.

Mobile Cameras

HTCD50/52 Mobile Digital Camera Series

The HTCD50/52 Series offers a high-impact, tamper resistant digital camera solution with higher quality images than traditional analog cameras. These cameras are compatible with the HTRD400 Series of recorders.

HTC70 Mobile Camera Series

The HTC70 Series offers an analog day/night camera that is useful in all light conditions encountered in vehicles.

These cameras are compatible with both the HTR62 and HTRD100 Series of recorders.

HTC29 Angle Dome Series

The HTC29 Series offers an analog dome that is flexible enough for use in a variety of locations. These cameras are compatible with both the HTR62 and HTRD100 Series of recorders.

Mobile Accessories

HTGPS Receiver Series

Using a system of 24 satellites and their ground stations, the HTGPS Receiver Series provides position, speed and direction information that can be tied to the video surveillance data.

HTR62 Mobile VCR Video Recorder

The HTR62 is a mobile VCR video recorder that is economical without

compromising features or durability. The HTR62 recorder can provide up to nine hours of recording on a VHS T180 tape. Ideal applications include: School bus.

FareView® Mobile Surveillance System

This mobile surveillance system has a compact, discreet camera which records still images of events or passengers stamped with time, date and VIN.

Ideal applications include: Taxi cab.

Mobile Video Security Solutions

Honeywell's high-performing mobile video security solutions are a critical component of an organization's security network.

Benefits include:

- Peace of mind by providing quality products that ensure safety for passengers and drivers.
- Reliability from a proven partner of choice who offers a world class line of mobile products.
- Durability of products that need to stand up to the test of time and meet stringent requirements, such as temperature and vibration controls.
- Cost effectiveness and efficiency to meet a variety of mobile needs.
- User friendly mobile products that offer uncompromising video clarity in a simple, easy-to-use format.
